Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Card.

There is disclosed in Card a filtering device, comprising: a vessel 11 having an opening 13 at a proximal end and a closed distal end 12, wherein the interior of the vessel has a cross-section with a dimension and the dimension varies with longitudinal distance from the opening such that the vessel has a plurality of dimensions; a compressible filter assembly 15, comprising a compressible filter element 17 and a compressible support element 20 mounted over the compressible filter element and configured to maintain contact with the interior of the vessel for each of the plurality of dimensions; and a plunger element 16 configured for pushing the compressible filter assembly through the vessel.

In regards to the use of the device for separating infusion material from an infused liquid, such is intended use only and provides no structural limitations to the claims. It is apparent that the device of Card could perform such a function. In regards to the vessel being a beverage cup, it is apparent that the vessel of Card could be used for beverages.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Card in view of Levinson.

Levinson discloses the use of a filter assembly wherein a paper filter is supported between two foam rings 14, 15.

It would have been obvious to one skilled in the art to substitute the compressible rings of Card with that disclosed in Levinson, in order to provide an alternative material for the rings.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Card in view of Monnet.

Monnet discloses the use of a lid having an aperture for the passage of a plunger element which is attached to a filter membrane 5.

It would have been obvious to one skilled in the art to provide the vessel of Card with the lid disclosed in Monnet, in order to prevent liquid from spilling from the vesse.

Allowable Subject Matter

Claims 11-20 are allowed.

Response to Arguments

Applicant's arguments filed 10 May 2006 have been fully considered but they are not persuasive. It is cited in the 102(b) rejection that compressible filter 17 has mounted over it, a compressible support element 20. Therefor the structural limitations of the claims have been met by the prior art of record.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
